

CREDIT KARMA

- ▶ GraphQL currently powers the dashboard, and is being expanded throughout the application
- ▶ Opted for GraphQL to reduce network requests, improve database isolation, and to automate the process of identifying and managing breaking changes
- ▶ “The tooling can now immediately identify breaking changes and notify everyone involved”

WALMART

- ▶ Walmart uses GraphQL to power mobile and web receipt viewing for both Walmart and Sam's Club. This system handles 500 - 2,000 receipts per second
- ▶ "We want to be free to evolve and improve our APIs without complex versioning schemes and complicated migration plans...when a client tells us they can't query for what they want, we can typically add the missing field or relationship, and deploy it in a matter of minutes"
