FACEBOOK CONT.

▸ GraphQL is confirmed to power the news feed, likely it has spread further throughout the application

▸ Currently handling billions of GraphQL requests per day

▸ "We don't think of data in terms of resource URLs, secondary keys, or join tables; we think about it in terms of a graph of objects and the models we ultimately use in our apps like NSObjects or JSON."

GITHUB

▸ Adopted GraphQL for version four of the public API

▸ Chose GraphQL for scalability and more fine-grain, field level control

▸ "Our responses were bloated and filled with all sorts of *_url hints in the JSON responses to help people continue to navigate through the API"
